IS YOUR QUOTE FAIR?

A quote between **\$40 and \$157** is inside the band where half of all Chevrolet Malibu headlight or bulb replacements landed. Below it is not automatically a bargain (a tail or signal bulb reachable in a minute); above it is not automatically gouging (headlight bulbs behind the bumper or inner fender, HID or LED units, both sides replaced) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Access** — some headlight bulbs change in a minute; others hide behind the bumper or wheel liner.
- **Bulb type** — HID and LED units cost multiples of a halogen bulb.
- **Pairs** — headlights are often replaced in pairs so both match in brightness and age.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
