IS YOUR QUOTE FAIR?

A quote between **\$327 and \$595** is inside the band where half of all Honda Accord starter replacements landed. Below it is not automatically a bargain (remanufactured starter mounted in the open); above it is not automatically gouging (OEM starter buried under the intake manifold or exhaust, corroded cables replaced) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Where it lives** — on some engines the starter is right on top; on others it hides under the intake — that's the whole price difference.
- **New vs. remanufactured** — reman starters are common and much cheaper.
- **Battery and cables** — a good shop rules them out before selling a starter.

ABOUT THIS DATA · HOW TO USE THIS REPORT

Vehicle **Honda Accord, model years 1981–2017**
Data confidence **High** — *large sample, stable ranges*
Records through **July 2026**, refreshed continuously
Source **paid invoices from independent US repair shops**

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
