IS YOUR QUOTE FAIR?

A quote between **\$69 and \$366** is inside the band where half of all Ford F-250 light assembly replacements landed. Below it is not automatically a bargain (a bolt-in tail light on an older vehicle); above it is not automatically gouging (LED tail assembly, bumper-mounted units needing cover removal, both sides for matching) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **LED or bulb** — LED assemblies are sealed units and cost far more.
- **Access** — bumper-mounted lights may need the cover off.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
