IS YOUR QUOTE FAIR?

A quote between **\$49 and \$251** is inside the band where half of all Toyota Camry headlight assembly replacements landed. Below it is not automatically a bargain (aftermarket halogen housing on an older vehicle, easy access); above it is not automatically gouging (OEM LED assembly, bumper removal required, both sides replaced for matching) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Halogen vs. LED** — LED and adaptive assemblies cost multiples of a halogen housing.
- **Access** — many vehicles need the bumper cover off.
- **Pairs** — a new housing next to a hazed one looks mismatched — many owners do both.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
