IS YOUR QUOTE FAIR?

A quote between **\$233 and \$557** is inside the band where half of all Chevrolet Silverado 2500HD transmission filter replacements landed. Below it is not automatically a bargain (a drop-and-fill on a small transmission); above it is not automatically gouging (large fluid capacity, synthetic specified fluid, pan bolts or a rusted pan replaced) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Fluid type and volume** — specified synthetic fluids for large transmissions add up fast.
- **Pan condition** — a rusted pan or stripped drain plug becomes a pan replacement.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
