IS YOUR QUOTE FAIR?

A quote between **\$166 and \$336** is inside the band where half of all Chrysler Town & Country thermostat replacements landed. Below it is not automatically a bargain (a stand-alone thermostat with a gasket); above it is not automatically gouging (an integrated thermostat-housing assembly, coolant flush, access under the intake) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Thermostat or housing** — many newer engines sell the thermostat only as part of a plastic housing.
- **Access** — some are on top; some live under the intake.
- **Coolant** — a full refill with the specified coolant is part of the job.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
