IS YOUR QUOTE FAIR?

A quote between **\$211 and \$656** is inside the band where half of all Chevrolet Silverado 2500HD power steering repairs landed. Below it is not automatically a bargain (a return hose or o-ring and a top-up); above it is not automatically gouging (pump plus pressure hose, tight access on a transverse engine, full flush) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Hose or pump** — a hose is the cheap end; a pump on a crowded engine bay is the expensive one.
- **Flush** — contaminated fluid is often why the pump failed — a flush protects the new part.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
