IS YOUR QUOTE FAIR?

A quote between **\$143 and \$312** is inside the band where half of all Ford F-150 muffler replacements landed. Below it is not automatically a bargain (universal muffler clamped to a sound pipe); above it is not automatically gouging (direct-fit OEM muffler with tailpipe, rusted pipe sections replaced, new hangers welded) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Universal vs. direct-fit** — a welded universal muffler is the economy path; OEM assemblies cost more.
- **How much pipe** — the metal around a rotten muffler is rarely healthy.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
