IS YOUR QUOTE FAIR?

A quote between **\$226 and \$448** is inside the band where half of all Chevrolet Silverado 3500HD fuel filter replacements landed. Below it is not automatically a bargain (single inline filter on a gasoline engine); above it is not automatically gouging (diesel primary and secondary filters, filter housing replaced, priming a hard-to-bleed system) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Gas vs. diesel** — diesel trucks run two filters at diesel-part prices.
- **Housing** — cracked or leaking filter housings add real cost.
- **Location** — in-tank filters mean tank work — a different job entirely.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
