IS YOUR QUOTE FAIR?

A quote between **\$340 and \$614** is inside the band where half of all Ford F-350 alternator replacements landed. Below it is not automatically a bargain (remanufactured unit on an easy-access engine, belt reused); above it is not automatically gouging (high-amperage or OEM unit, alternator mounted low or under the intake, new belt and tensioner added) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **New vs. remanufactured** — reman units run well below new OEM; quality varies by supplier.
- **Access** — some engines hide the alternator under the intake or behind the engine mount.
- **Belt and tensioner** — a tired belt is usually replaced while everything is apart.
- **Battery check** — a dead alternator often takes the battery with it — a good shop tests both.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
