IS YOUR QUOTE FAIR?

A quote between **\$149 and \$310** is inside the band where half of all Toyota Tacoma car battery replacements landed. Below it is not automatically a bargain (economy battery, charging test skipped); above it is not automatically gouging (AGM battery for start-stop or heavy accessories, corroded cables, a battery mounted under a seat or fender) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **AGM vs. flooded** — AGM batteries run well above a standard flooded battery in parts.
- **Cables and terminals** — corroded ends add parts and time.
- **Registration** — many newer vehicles need the new battery registered to the car.
- **Charging-system test** — a good shop confirms the alternator first.

ABOUT THIS DATA · HOW TO USE THIS REPORT

Vehicle **Toyota Tacoma, model years 1995–2025**
Data confidence **High** — *large sample, stable ranges*
Records through **July 2026**, refreshed continuously
Source **paid invoices from independent US repair shops**

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
