IS YOUR QUOTE FAIR?

A quote between **\$149 and \$291** is inside the band where half of all Ford Focus sway bar link replacements landed. Below it is not automatically a bargain (a pair of end links, easy access); above it is not automatically gouging (links plus bushings, seized hardware cut off, rear links behind the exhaust) — but both ends deserve a question.

WHAT MOVES THE PRICE

- **Links or bushings** — links are the usual culprit; bushings add parts and time.
- **Seized hardware** — rusted link bolts often get cut, adding time.

Bring it to the shop. Ask for the written estimate split into parts, labor hours and rate, and fees — then compare each line. A shop that explains a number above the range is doing its job; one that won't is telling you something too.

NOT A QUOTE This report describes what other owners paid for the same repair. Your year, engine, region and the parts chosen shift the number. FixDozer does not perform repairs and receives nothing from shops.
